

Viviane de Santana Paulo*

A migração como expansão da realidade e renovação das culturas

The essay is about Vilém Flusser's philosophy of migration and considers the importance of custom, the permanent residence, and the material possessions required for human existence. The different languages, customs, beliefs and geographical regions lead one to understand reality in different ways, all of which influence one's self-expression. In the book, *Von der Freiheit des Migranten*, Vilém Flusser investigates the phenomenon of migration by way of analyzing applicable philosophical concepts, although he does not ignore some important matters related to politics and the economy.

Keywords: migration, Dasein, cultural interchange
